

GRO-BARK®

GRO-BARK (ONTARIO) LTD.

Gro-Veg®

Gro-Veg® Market Garden Soil

- Well balanced complete vegetable garden soil
- Blend of compost, aged bark, peat, topsoil and manure
- Resists compaction
- Formulated for optimum root growth, stability, and plant health
- High organic matter content, optimum pH, water holding, and porosity

Gro-Veg® is designed for vegetable and herb garden beds and planters. It can be used for a variety of plants including annuals, perennials, and biennials.

Typical Analysis:

pH: 6.5-7.5

EC: <2.5 mS/cm

Organic Matter Content: 15-25% by weight

Bulk Density: < 1.3 g/cc

How to Optimize Results:

This soil has been amended with an organic based 6-3-6 fertilizer as a starter charge that should last approximately 4-6 weeks. The longevity of this product is highly dependent on environmental conditions including temperature and irrigation.

Supplemental nutrition may be required to maintain plant health throughout the growing season.
