WASTE STREAM INFORMATION SHEET

Details of Waste Acceptance and Disposal:				
Item:	Applicable		Details:	Provide Copies of Procedures
	Yes	No		
General:				
Waste acceptance procedures:	✓			
Procedures for confirming the waste is non-hazardous solid waste:	✓			
Procedures for monitoring waste accepted by the facility	✓			
Procedures for managing unacceptable waste	✓			
Does the facility conduct any evaluation programs for its sites customers				
Training programs currently in place (e.g. emergency response, waste handling - note training frequency)				
Non-Hazardous Wastes:				
Is there onsite waste processing?				
Does facility accept wastes from other transfer/processing facilities?				
Does your facility have a tire segregation program?				
Does your facility have a materials recovery (recycling) program?				
Subject Waste (Hazardous and Liquid Industrial):				
Does facility process hazardous waste?				
Procedures to ensure processed listed hazardous waste does not mix with the non-hazardous waste stream prior to disposal?				
Where are subject wastes disposed of?				
Waste Delivery Details				
Name Waste(s) to be disposed of				
Estimated Annual Tonnage to be Disposed of				
Waste Hauler(s) Name				

Waste Acceptance Agreement			
<p>WHEREAS Niagara Waste operates a non-hazardous solid waste landfill site ("the site"). AND WHEREAS Niagara Waste has agreed to accept non-hazardous solid waste as defined by Ontario Regulation 347, from the Generator (the Generator). IN CONSIDERATION of the acceptance of such wastes and the payment therefore, the parties agree as follows:</p> <ol style="list-style-type: none"> 1. The Generator warrants that all waste deposited by or on behalf of the Generator at the site will be non-hazardous solid waste as defined by Ontario Regulation 347. 2. The Generator warrants that it will not deposit at the site any wastes either prohibited by the Regulation or which Niagara Waste has indicated it will not accept. 3. Should any illegal or unacceptable waste be found in any load, or, after deposited in the landfill and traced to the Generator, the Generator authorizes Niagara Waste to have such illegal/unacceptable waste removed from the site at the Generator's expense, and undertakes to pay such charges forthwith. 4. The Generator undertakes to advise Niagara Waste of the source of any illegal/unacceptable waste delivered by or on behalf of the Generator to the site. 5. The Generator understands that operational or other requirements may make it necessary for Niagara Waste to modify the way waste is accepted, and to deem a waste stream unacceptable upon one week's notice to the Generator. <p>The Generator will indemnify and save harmless Niagara Waste from any loss, damage, action, prosecution, fine, costs, expenses (including the expenses of defending any such action or prosecution), or other costs to which Niagara Waste may be subject to as a result of any misrepresentation by the Generator or the deposit of any illegal/unacceptable waste by or on behalf of the Generator at the site.</p>			
<p>Certification: On behalf of my employer I certify that all information provided in and with this form is complete and accurate. I also acknowledge that I have signing authority for this agreement from my company and as such bind my company to the requirements within this Waste Acceptance Agreement.</p>

WASTE STREAM INFORMATION SHEET

Follow Up / Onsite Tour – Check All That Apply

Site	
Date	

Tour area: (check areas inspected):			
perimeter entrances	storage areas	storm water retention	
vehicle check-in	pipng	contaminated liquid holding	
holding areas	process equipment	waste handling/treatment	
vehicle cleaning	laboratory	waste disposal areas	

Housekeeping	Excellent (no stains, spills)	Good (minor stains, spills)	Poor (disorganized, hazards)
Facility			
Laboratory			
Other:			

Identify operations that are conducted outdoors:			
liquid unloading	solids unloading	drum unloading	
liquid loading	solids loading	drum loading	
liquid transfer	solids transfer	drum storage	
liquid storage	solids storage	processing/treatment	

Areas of Concern			
improper storage	lack of containment	evidence of releases/stains	
co-mingled waste	paving/surface cover	visible emissions	
container stacking	surface drainage	odour	
generator labels	standing water	noise	
drum handling and disposal	loading/unloading areas	housekeeping	
backlog of waste	floor drains	vehicle trackout	
waste acceptance	vehicle maintenance	debris	
process equipment	general maintenance	birds, rodents	
storage tank integrity	training	other	

Approve Waste from Facility:	Yes	No	NWSL Code
