

# Walker Environmental Group Niagara Campus

## Our Environmental Management Campus in Niagara Integrated Businesses Include:

### Landfill

We operate one of the safest solid non-hazardous waste landfills in Ontario. The South Landfill uses state-of-the-art technology to protect groundwater and the environment.

### Compost Facility

We turn food, wood and yard waste into compost and mulch that is highly-desired by gardeners, nurseries and soil manufacturers.

### Residential Waste Drop-off

We serve St. Catharines, Niagara Falls and Niagara-on-the-Lake residents at our residential drop-off, which accepts waste and recyclables.

### Landfill Gas

Our landfill gas utilization system safely puts landfill gas to productive use by fueling industrial energy needs or generating electricity. In addition, the gas utilization helps control odour and significantly reduces greenhouse gas emissions.

### Biosolids Management

Our facility treats biosolids from a municipal wastewater treatment process to produce an agricultural amendment that is pasteurized, nutrient-rich with low-odour, and prized by the agricultural community as an alternative to more costly fertilizers.
